DEFINITION

Research report is a condensed form or a brief description of the research work done by the researcher. It involves several steps to present the report in the form of thesis or dissertation.

CHAPTER I- Introduction

Significance of the Study

This section creates a perspective for looking at the problem. It points out how your study relates to the larger issues and uses a persuasive rationale to justify the reason for your study. It makes the purpose worth pursuing. The significance of the study answers the questions:

- Why is your study important?
- To whom is it important?
- What benefit (s) will occur if your study is done?

17

In terms of small-sized products, the 1-inch to 5-inch sizes are available from Taiwan suppliers. The displays with 1-inch to 3-inch are applied for industrial applications like kiosk information displays. As for the smartphones, enlarged display size and resolution are two major R&D trends to follow. The available sizes for smartphones are enhanced from 3-inch and 4-inch to the 5-inch size.

The mainstream size for the smartphone display is 4.3-inch size where is the major battlefield for AMOLED and LTPS TFT LCD displays since 2011. The 4.8-inch, 5.3-inch and 5.5-inch are other three markets to compete. At present, LTPS technology is dominant; however, AMOLED is seen to keep up or even surpass in the years to come. Witview points out that an AMOLED panel with touch function for a mainstream 4.3-inch smartphone display is only 30 to 35 percent higher in price to a LCD panel with touch function of the similar size; however, the price difference between 7-inch AMOLED and LCD panels for tablet PCs can be 90 percent high.

The current mobile phones are equipped a-Si, LTPS, AMOLED and STN displays. No doubt, the OLED display is positioned as the high-end market by 2015. The major application for OLED is still the smartphone which can afford the high cost for the high-quality display. We can see a growing trend of increase shipment on smartphones. So far, 15 to 20 percent of smartphones are equipped with OLED displays. Nowadays, the AMOLED technology is uprising at the introduction stage with high cost and low yield rate. However, its thinner form factor and fast response time are two major advantages over the LCD technologies. To be detailed, the OLED display emits light itself without backlight unit to achieve power-saving and slim form factor which are essential to the portable electronic devices. To the LCD technology, AMOLED display is a new competitor without advantages in pricing and production scalability. However, its born thinness and high visual quality makes it a definite threat. In comparison with OLED and TFT LCD displays, the OLED technology edges out the TFT LCD over vivid

color presence, high contrast and free viewing angle.

The OLED technology supports no gamut change at different gray levels, constant high contrast when viewing angle changing, and free viewing angle unlike TFT LCD technology supporting +/-180 degree viewing only.

AU Optonics (AUO) is the leading supplier of OLED displays in Taiwan. The company introduced the world's first AMOLED product for mobile phones in 2006, and released 4-inch flexible AMOLED displays and 32-inch AMOLED displays in 2011. Co-working with SONY, AUO released 56-inch 4K1K IGZO OLED TVs in 2012. AUO says AMOLED technology features ultra-high speed performance, winning over the TFT-LCD technology. For instance, AMOLED features free of motion blur with fast response time; its Motion Picture Response Time (MPRT) of 120Hz AMOLED is closed to TFT-LCD with 240Hz frame rate. Being endowed with wide temperature feature, it maintains fast response in low temperature environment, <10 μsec at and below 25°C. The TFT-LCD performs 2 to 200 ms instead.

The high cost and low yield rate are two major hurdles to the mass adoption

The AMOLED display production is concentrated in 3.5G and below. In comparison with TFT LCD, the number of tablet PC panels cut from glass substrates is much lower, and the cost is higher. The TV market is one of the most important markets to panel makers besides the smartphone's. However, the TV prices are three times higher than LCD TVs so far. Witview predicts the pricing of OLED TVs can still be two times higher in three years with a rather slow growing popularity. However, that more TV suppliers are anticipating he 2014 is regarded as a driving force to push the adoption rate. As for the PC-related segments like tablets, notebooks and desktop PC monitors, the penetrate rate is relatively low because they are price-sensitive and low-cost oriented. Take the tablet PC for an example, the Witview indicated that the low-

Must Visit Place #1	Name/Date/Period:
Must Visit Place #1	Due May 27
Go to www.usbravest.blogspot.com for specific directions.	
Name: Vancouver, British Columbia	
Where Specifically, is it located within the country? Located in the province of British Columbia in Western Canada.	
Vancouver is in the southern part of the prov.	
Important detail #1: Largest metro area in B.C. and the 2nd largest in Canada. 2.6 million people live there.	
Important detail #2: Hockey is very popular, the main Vancouver team is the Vancouver Canucks. The season runs from Oct-April, they play at the City Centre.	
Important detail #3: Vancouver is a very diverse city, culturally speaking. They have a large Asian population and Chinatown is a popular tourist site. In June they have dragon boat races.	
Why should I visit here? (give at least 2 reasons)	
Mr. Tater should visit Vancouver because it is not only very beautiful (you can see the Coast mountains and the Pacific ocean), but also there are many things to do there, like hockey games, Chinatown, lots of shopping and great restaurants.	

Brief definition of introduction in research.

It must be written systematically and carefully connected. Think in terms of these questions: What research gap is your work intended to fill? The key is to guide the reader in their topic and situate their ideas. An argumentative article presents a thesis declaration, while an empathic article usually represents a research question (sometimes with a hypothesis as to the answer). Step 2: Describe the background this part of the introduction differs depending on what is approaching its role. Think of an interesting or statistical fact, a strong declaration, a question, or a brief anecdote that will get the reader wondering about his typical. Step 5: Map your role the final part of the introduction is often dedicated to a brief general view of the rest of the paper. However, this article suggests that Y... You will start from consensus on your topic, establishing a new position. The practical usefulness of the research study depends strongly on the way they are presented that they should act based on research discoveries. This study left to answer the next question: What effects is the use of Instagram in the prevalence of body image problems between adolescent girls? Apã Dex (Additional Details): (i) Counties of Used Forms Used à C ught (ii) Tables not included in discoveries (iii) A question of questionnaire (IV) Sampling detail and response rate (V) Demonstration of Expenses (VI) Bibliography (VII) List of books, magazines, journals and other reports (VII) any other relevant information considerations / factors: while preparing the research report, Dresses should be considered: (i) Objectives (ii) Type of Problem / Subject (iii) Nature and Research Type (IV) Audience or Research Work (V) Report Size (VI) Writing form - handwritten, typed or computerized. Argumentative role: background information after you took the of your reader, specify a little more, providing context and and your topic. Declaration of this article argues that the Dutch government should stimulate and subsidize cattle farmers, especially cattle farmers, for sustainable plant agriculture transactions. The report must be attractive. You will build something suggested by a previous study, explore it in greater depth. Learn more we evaluate scientific data on air quality, tobacco and pulmonary catence to inform the bullshit, boost the positive policy change, and improve the pill. These emissions result from nitrogen in manure, which can degrade in ammonia and enter the atmosphere. Start by establishing the types of research that was done and end with limitations or gaps in the research you intend to answer. This is a thumbnail literature revision - a sketch of the current state of research in its technical, cooked for some sentences. The rest of the article will be resumed to discuss and investigate this question. Here you need to express it. This is usually performed with a strong opening hook. Step 4: Specify your goal (s) now, you will enter the specificities of what you want to discover or express in your search document. These studies have consistently discovered that the visual and interactive aspects of the tanned platform the greatest influence on body image problems. EMPARRIC PAPER: Describing previous research for an article describing the original research, you will provide a more relevant general research vision that has already been conducted. It requires a good knowledge of knowledge, imagination, experience and experience. If your research involved testing hypotheses, they must be declared along with your research question. By comparison, the roadbug and the Famãias are responsible for 6.1%, each industrial sector for 1%. Argumentative role: emphasize the importance in an argumentative article, you can simply the problem you want to argue, and what is or important about your argument. This article will first discuss various Examples of research based on research on the use of social mothers of the adolescents, I will go to ... This article first discusses various examples of survey based on the use of the use of the use of Teen's social moms, they continue to Research role Introduction Examples Examples complete examples of research paper introductions are shown in the guides below: one for an argumentative role, the other for an empathic paper. In a more empathic role, this is the place to review previous research and establish how you fit. It is necessary to employ a suitable format to create a clearly desirable impression. The preparation of the research report is not a fancil task. Learn more our programs and subjects Funds Programs The best and brightest scientific minds designed to create a world free of pulmonary disease. But if your article is structured in a less predictable way, it is important to describe the way it is for the reader. 3. We investigate the effects of Instagram's daily use on the prevalence of body image questions among adolescent girls. Research report is a means to communicate research work with relevant people. The introduction to a research work is where you configure your typical and approach to the reader. Your research may be less extensive than in a complete literature review, but a clear sense of relevant research is crucial to informing your own work. Research Report is divided into three parts such as: I. Usually it is assumed that x. What limits in the previous work address? The way you picture you varies. They are usually presented in the right, as the hypothesis will have been tested as you are writing your article. Definitions: 1. (vii) time and cost (viii) Language (IX) Namers, size and source type, coloring, etc. Argumentative Document: DECLARATION OF THEOSIS The declaration of thesis expresses the position for which the rest of the article will present evidence and arguments. Normally, the following format is suggested as a basic outline, which has sufficiently flexible to meet the largest number of situations. You will approach an previously forgotten aspect of your typical. Often the results of the research are not in a row due to the inadequate presentation. (XIII) Ligament (for smooth and, particularly, for printed card) - type, material quality, color, etc., related problems. First part (part of formality): (i) coverage pandin (ii) tin (iii) certified or declaration (iv) (Detailed) (VI) Recognition (vii) List of tables and figures used (VIII) Pregcate/referral/introduction (IX) Summary Report II. A report should use the format (usually called the structure) that best meets the needs and desires of its readers. Step 1: Present your first work of the introduction is to tell the reader what is your topic and why it is interesting or important. The American Lung Association Airways Clinical Research Center (ACRC) network conducts large clinical tests that directly affect patient care to COPD and asthma. It requires considerable time and money. Study calculations show that agriculture is the main source of pollution per nitrogen, representing 46% of the total number of paàs emissions. The five steps in this article help you set up an effective introduction to any type of research work. A more empathic article that investigates the relationship of Instagram using body image problems in teen girls can use the following hook: the empathic paper hook. The format depends on variable varying varying ones. Step 3: Problem The next step is to clarify how its own research fits and in what problem it addresses. This should be informed by genuine involvement with literature. The research report is a written document that contains the -chave aspects of the research project. Clarity and relevance is even more important than sensitivity. It is also a good source of preservation of research work for future refinement. It can be in the form of writings, typed or computerized. 2. For example, the following hypothesis may respond to the research above: The hypothesis was raised the hypothesis that the use of Instagram would be associated with an increase in body image concerns and a decrease. In the classifications of self-esteem. Report format: No better format for all reports. The approach presented here is radical, but proportional to a question. Nevertheless, Highly Visual Social Mother (HVSM) as Instagram has not yet been researched with robustness. Emphalic paper antecedent votes for empathic studies were conducted in the use of Facebook among adolescent girls (Tiggermann & Slater, 2013; Meier & Gray, 2014). It can be presented in one or two sentences and must declare its position clearly and directly, without providing specific arguments for it at this time. Argumentative introduction Introduction The introduction of empathic article often asked questions about the introduction of the research article, we can also define the term as: research report is one Research document containing basic aspects of the research project. What contributes to knowledge is this? Has Objectives -Chave: Present your T.P. and Fault with which the reader is interested, provision antecedents or summarize the existing research position, your own approach to your specific research problem, provision to a general view of the structure of the article, the it seems a little different, depending on whether your article presents the results of the original empathic research or build an argument involving involving a variety of sources. Similarly, we can say: The research report involves relevant information on the research work carried out. Arguing antecedents A recent study (RIVM, 2019) shows that cattle farmers represent two agricultural emissions in the Netherlands. The introduction is not the place to deepen too much; if deeper is essential for your article, it can appear in the body. The phrase connection, although X was studied in detail, insufficient care was given to Y. Problem argumentative role research, while efforts are being made to mitigate these emissions, controversy are reluctant to agree with the scale of the problem. The implications of study X deserve to be exploited even more. A research question can be framed directly or indirectly. If included, the general vision must be concise, direct and written in the present time. It is an art. Do not feel that your hook necessarily needs to be deeply impressive or creative. In a structured article using the "introduction, mom, results, discussion format", this is not always necessary. You can do the connection between your problem and the existing search using phrases like the following. EMPARRIC ARTICLE: Research question and hypothesis The research question is the question you want to answer in an empathic research article. The hook is an impressive opening phrase that clearly transmits the relevance of its t. EMPARRIC ARTICLE: Literature refers to an empathic research article, try to bring the problem based on your discussion about literature. In simple words: the research report is the system of system, articulated and ordered of the written way research work. Present your research question clearly and directly, with a mother of discussion right now. Main report (central part of the (i) Objective declaration (ii) Research Research Methodology and Design Data Types and Your Fountains (IV) Data Collection (V) Data Collection Tools (VI) Data Collection Tools (VII) Field Analysis (VIII) and interpretation (including tables, graphics, figures, etc.) (IX.) Limitations (xi) Conclusions and recommendations (XII) Any other relevant detail III. For example, the following could be an effective hook for an argumentative role on the environmental impact of cattle agriculture: Argumentative Paper Hookare Cows responsible for climate change? On a more argumentative role, you will explore some general background here. Provide only the most relevant antecedent information. Learn more for the most part, research work is presented in writing. Format.
